

BR-4 GREASE

BR-4 grease is a water-resistant, multi-purpose calcium grease with a fibrous structure, produced with high quality base oils and special additives. It is suitable for use in low and medium speed bearings, low speed plain bearings and chassis applications where the operating temperature does not exceed 80°C.

Features and Benefits

- ✓ They provide the opportunity to work under impact loads with their superior extreme pressure properties.
- ✓ They extend bearing life by reducing fatigue and wear.
- ✓ Thanks to the additives and fibrous structure in its structure, it adheres to metal surfaces, protecting the metal and preventing waste.

Technical specifications

| Method | Value |
|-----------------------|-----------------------|
| Soap Type | Ca |
| NLGI | ASTM D 217 2 |
| Penetration 25°C | ASTM D 217 265-295 |
| Dropping Point, °C | ASTM D 566 Min.105 |
| Colour | Yellow/Brown |

Storage Information

- ✎ Packaging; It should be stored in covered areas with tightly closed lids.
- ✎ It should not be exposed to the direct effects of solar heat and heat sources.
- ✎ For more information, refer to the Material Safety Data Sheet (MSDS).
